SUMMARY

I am a software engineer with 5 years of experience, specialized in technologies such as React Native, React.js, Next.js, TypeScript, and JavaScript. I am constantly seeking to enhance my skills and knowledge, prioritizing best coding practices, performance, and usability.

I am looking for an opportunity that challenges me and allows me to grow while collaborating in the creation of innovative, high-quality solutions.

WORK EXPERIENCE

C&A

Mobile Developer | Apr 2025 – Present

I'm part of the team responsible for migrating native applications to React Native, using TypeScript and following best practices in modern development and architecture. We work with the latest technologies in the React Native ecosystem, always focusing on performance, scalability, and maintainability.

I'm also involved in the ongoing maintenance and improvement of mini apps integrated via WebView, contributing through code reviews and ensuring code quality with solid engineering practices.

On a daily basis, we use Azure DevOps to organize tasks, track deliveries, and maintain smooth collaboration across teams, ensuring an agile and well-structured workflow.

Sysmap Solutions

Mobile Developer | Apr 2025 – Present

The Brooklyn Brothers

Frontend Developer | Jun 2024 – Mar 2025

- Worked in Unilever's Innovation Squad, developing modern and functional websites for its international brands.
- Developed reusable components and new features for corporate websites and advertising campaigns.
- Collaborated with designers and stakeholders to ensure an intuitive and efficient user experience.
- Ensured code quality and standardization.

Notable projects include: Textspañol for Verizon, the world's second-largest telecommunications company, and Welcome to Mountain Time for Mountain Dew/PepsiCo – demonstrating adaptability and competence in delivering high-level services to global companies.

MB Labs

Mobile Developer | Nov 2022 – Jun 2024

- Developed financial solutions for VR Benefícios, including the Digital Account mini app with core banking features such as bill payments, Pix transfers, limit management, Pix key registration, and more.
- Created features for the Credit mini app, such as FGTS advance, payroll loans, and salary advance.
- Worked on Microfrontend (Module Federation) for the Consigned Credit Portal, improving scalability.
- Achieved 80% unit test coverage using Jest and Testing Library, covering Statements, Branches, Functions, and Lines.

Marttech

Frontend Developer | Jun 2021 – Nov 2022

- Developed applications for ZAZ Vendas using React.js, React Native, TypeScript, Styled Components, and other technologies to build scalable interfaces.
- Implemented Google Maps API for routing and geolocation functionalities.
- Integrated advanced reporting using Microstrategy Embedding SDK.
- Managed projects with Jira Software and Azure DevOps to ensure time and task control, effective team collaboration, and an organized workflow.

FAPESP (São Paulo Research Foundation)

Researcher | Jul 2020 – Jun 2021

- Participated in the project “Detection of people in uncontrolled environments using Haar Cascade classifier”, funded by FAPESP under the supervision of Prof. Dr. Celso Olivete Júnior.
- Gained expertise in computer vision and machine learning techniques, enhancing scientific research skills and understanding the importance and impact of academic research.

EDUCATION

2025 - 2026 | Descomplica Faculdade Digital

Postgraduate Lato Sensu, Cross-platform Mobile Application Projects

2022 - 2024 | Universidade do Oeste Paulista

Bachelor of Technology, Systems Analysis and Development

2016 - 2018 | ETEC - Escola Técnica Estadual de São Paulo

Technical Course, Internet Computing

SKILLS

- Frontend: React Native, React.js, Next.js, TypeScript, JavaScript
- Backend: Node.js, Nest.js, Express.js
- State Management: Redux, Context API, Zustand
- Styling: Styled-Components, Tailwind CSS, Material UI, Bootstrap, CSS, Sass, Less
- Principles: Clean Code, SOLID, Clean Architecture
- Other Tools: Jest, Testing Library, Axios, Firebase, Swagger, Google Analytics, Git
